1.0 EXECUTIVE SUMMARY

This report summarizes the findings of PIC Environmental Services (PIC) Phase I Environmental Site Assessment (ESA) for the subject property referenced as Carmel Enterprise, LLC, 337 East Carmel Street, San Marcos, CA 92078. This report has been prepared in accordance with ASTM Standard Practice E1527-21.

The subject property is located on the southeast side of East Carmel Street, between Industrial Street and Venture Street, in the University District of San Marcos, San Diego County, California (Figures 1-3). It consists of an approximately 6.13-acre parcel of recently-graded land improved with storm water runoff transmission and/or containment structures (APN 220-201-90). It is vacant with respect to occupation for residential or commercial uses. There is miscellaneous construction demolition debris and aggregate products, such as cobble stone, temporarily stored in piles locally on the site. There is an unlined storm water containment pond in the northern portion of the site, and newly-constructed concrete storm water transmission structures in the eastern portion of the site. General site features are depicted on Figure 3 and site photographs are provided in Appendix B. The property is owned by Carmel Enterprise, LLC. There were no RECs associated with recent use or ownership. The ESA results are summarized as follows:

- The subject property was apparently used for limited agricultural purposes such as dry farming and/or livestock grazing during and prior to the 1950s. It appeared unlikely that there were any significant adverse impacts to the site in PIC's judgment based on experience with comparable properties in the site vicinity. There was no apparent historical development of the subject property for significant residential or commercial uses with the exception of the former residential structure in the south-central portion of the site. There were no RECs identified for the subject property based on historical information reviewed for this ESA.

- The major land use feature in the site vicinity is California State University San Marcos (CSUSM). The site vicinity is improved mostly with light industrial properties; however, the area is undergoing rapid re-development. The subject property is bounded to the northwest by East Carmel Street and the Highway 78 right-of-way beyond; to the northeast by light industrial properties; to the southeast by Enterprise Street and Trade Street and light industrial properties beyond; and to the southwest by a vacant land parcel and the North County Transit District Sprinter rail-line beyond.

- There was no evidence of the storage or use of hazardous materials or regulated substances at the subject property.

- No evidence was observed that the subject property has been adversely impacted by contamination on adjacent or nearby properties.

- It is unlikely that the subject property has been adversely affected by releases of hazardous or regulated substances at any sites in the vicinity based on information presented in the attached FirstSearch Report provided by Environmental Data Resources, LLC (EDR).

- This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property, and PIC recommends No Further Action at this time regarding environmental site assessment and/or mitigation.

2.0 INTRODUCTION

2.1 Purpose of Investigation

PIC Environmental Services (PIC) was contracted by Carmel Enterprise, LLC, the property owner, to perform a Phase I Environmental Site Assessment (ESA) for the subject property referenced as Carmel Enterprise, 337 East Carmel Street, San Marcos, CA 92078. This ESA was conducted in order to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (landowner liability protections): that is, the practice that constitutes "All Appropriate Inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C §9601(35)(B). In addition, a purpose of this Phase I ESA is to document compliance with 24 CFR §58.5(i)(2) or §50.3(i).

The objective of this investigation was to identify the presence of any recognized environmental conditions (RECs), including controlled recognized environmental conditions (CRECs) and historical recognized environmental conditions (HRECs), in connection with the subject property. RECs are defined as "(1) the presence of any hazardous substances or petroleum products in, on, or at the subject property; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."

CRECs are defined as "a recognized environmental condition (REC) affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, activity and use limitations or other property use limitations)."

HRECs are defined as "a previous release of any hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example activity and use limitations or other property use limitations)."

The term REC is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Involved Parties

This ESA was authorized by and/or prepared on behalf of Carmel Enterprise, LLC and Sea Breeze Properties, LLC.

2.3 Scope of Work/Limitations

This Phase I Environmental Site Assessment was performed in conformance with the scope and limitation of ASTM Standard Practice E1527-21. The scope of this investigation included:

- Site reconnaissance and appropriate interviews;
- Reconnaissance inspection of adjacent and nearby properties;
- Review of federal, state, and local regulatory agency records;
- Review of standard historical site use information sources; and
- Review of physical setting sources including topographic, geologic, and hydrologic information.

No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connections with a property. The performance of the environmental site assessment described in this report was conducted to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the subject property within reasonable limits of time and cost.

The scope of this investigation did not include considerations that are considered beyond the scope of ASTM Standard Practice E1527-21 such as inspections for asbestos containing materials (ACMs), mold, lead-based paint, lead in drinking water, per- and polyfluoroalkyl substances (PFAS), regulatory compliance, or other non-scope considerations.

2.4 User Provided Information

PIC was not provided with any information regarding the results of research into environmental liens or AULs in connection with the subject property. ASTM Standard Practice E1527-21 does not impose on the environmental professional the responsibility to undertake a review of recorded land title records for environmental liens or activity and use limitations; however, in order to satisfy the standards and practices for All Appropriate Inquiries (AAI), the user may wish to engage a title company or title professional to undertake such a review.

An User Questionnaire was completed by the owner of the subject property and/or its representative, and they indicated that they were not aware of any environmental liens or AULs in connection with the subject property (Appendix A).

2.5 Data Gaps

No significant data gaps and/or data failure that would affect PIC's ability to identify RECs in connection with the subject property were encountered in the course of this ESA.

PIC was not furnished with any information regarding a review of recorded land title records for environmental liens or AULs; however, the current property owner or their representative indicated on the attached User Questionnaire that they were unaware of any environmental liens or AULs in connection with the subject property. In PIC's judgement, this data gap does not affect our ability to identify RECs in connection with the subject property.

3.0 PROPERTY CHARACTERISTICS & PHYSICAL SETTING

3.1 Location

The subject property is located on the southeast side of East Carmel Street, between Industrial Street and Venture Street, in the University District of San Marcos, San Diego County, California (Figures 1-3).

3.2 Subject Property Description

The subject property consists of an approximately 6.13-acre parcel of recently-graded land improved with stormwater runoff transmission and/or containment structures (APN 220-201-90). It is vacant with respect to occupation for residential or commercial uses. There is miscellaneous construction demolition debris and aggregate products, such as cobble stone, temporarily stored in piles locally on the site. There is an unlined stormwater containment pond in the northern portion of the site, and newly-constructed concrete stormwater transmission structures in the eastern portion of the site. General site features are depicted on Figure 3 and site photographs are provided in Appendix B.

The property is owned by Carmel Enterprise, LLC. There were no RECs associated with recent use or ownership. General site features are depicted on Figure 3, and site photographs are provided in Appendix B.

3.3 Adjoining Properties

The major land use feature in the site vicinity is California State University San Marcos (CSUSM). The site vicinity is improved mostly with light industrial properties; however, the area is undergoing rapid re-development.

The subject property is bounded to the northwest by East Carmel Street and the Highway 78 right-of-way beyond; to the northeast by light industrial properties; to the southeast by Enterprise Street and Trade Street and light industrial properties beyond; and to the southwest by a vacant land parcel and the North County Transit District Sprinter rail-line beyond. Land use on adjacent properties and within the immediate site vicinity is illustrated on Figure 3.

3.4 Topography

The elevation at the subject property is approximately 590 to 620 feet above mean sea level. The land surface grade in the site vicinity slopes gently to the northwest, toward San Marcos Creek (Figure 2).

3.5 Soils/Geology

Surface soils on the subject property include Placentia sandy loam (PeC) and Visalia sandy loam (VaB) according to the on-line USDA soil survey map. These soil types commonly occur on slopes ranging between 2% and 9%. The parent material consists of alluvium derived from granite.

The surface geology at the subject property and vicinity is depicted on published geologic maps as mid-Cretaceous-aged Green Valley Tonalite (CDMG, 1996).

3.6 Surface Water Hydrology

Surface water runoff flows northwesterly to San Marcos Creek, which flows southwesterly to Lake San Marcos. The outlet of Lake San Marcos flows southwesterly to Bataquitos Lagoon, which empties into the Pacific Ocean approximately 11 miles southwest of the subject property.

3.7 Hydrogeology

The subject site lies in the Richland Hydrologic Subarea of the San Marcos Hydrologic Area within the Carlsbad Hydrologic Unit, part of the San Diego Region (*Water Quality Control Plan for the San Diego Basin (9)*, California Regional Water Quality Control Board, On-Line). Potential and existing beneficial use designations of groundwater in the Richland Hydrologic Subarea include municipal and domestic supply, agricultural supply, and industrial service supply.

Site specific information regarding the depth to groundwater and groundwater gradient direction beneath the subject property was not readily available. The depth to groundwater has been encountered at a nearby site at depths ranging from approximately 10 to 15 feet below ground surface (bgs) and flows generally to the north or northwest.

No municipal groundwater production wells were depicted within ½-mile of the subject property on the USGS topographic quadrangle.

4.0 SITE RECONNAISSANCE

A site reconnaissance was conducted by a representative of PIC on January 25, 2024 in general accordance with the scope and limitations specified in ASTM Practice E1527-21. The objective of the site reconnaissance was to identify potential RECs in connection with the subject property. Findings of the site reconnaissance are summarized as follows.

4.1 Hazardous Materials/Regulated Substances

No evidence of the storage or use of hazardous materials or regulated substances was observed at the subject property. No strong, pungent, or noxious odors were encountered, and no evidence of pools or sumps containing liquids likely to be hazardous materials or regulated substances was observed at the subject property.

4.2 Above Ground Tanks and Drums

No evidence of above ground storage tanks (ASTs) or other containers of hazardous materials or petroleum products was observed at the subject property.

4.3 Underground Storage Tanks & Containment Structures

No evidence of existing or former underground storage tanks (USTs), sumps, ponds, or other subsurface structures used to contain hazardous or regulated substances was observed at the subject property.

4.4 Polychlorinated Biphenyl Containing Equipment

No evidence of leakage and/or spillage from equipment possibly containing polychlorinated biphenyls (PCBs) was observed at the site.

4.5 Interior Observations

No evidence of significant stains or corrosion associated with hazardous materials was observed on the floors, walls, or ceilings of the subject property buildings.

4.6 Exterior Observations

No evidence of pits, ponds, or lagoons was observed at the subject property. No evidence of significant surficial staining, stressed vegetation, or septic systems was observed at the subject property. No evidence of groundwater production wells, injection wells, or groundwater monitoring wells was observed at the subject property.

With the exception of some small piles of concrete demolition debris, no evidence was observed of solid waste disposal such as stockpiles or areas that are apparently filled or graded by non-natural causes (or filled by soil of unknown origin) suggesting trash or other solid waste disposal.

4.7 Area Reconnaissance

The major land use feature in the site vicinity is California State University San Marcos (CSUSM). The site vicinity is improved mostly with light industrial properties; however, the area is undergoing rapid re-development.

The subject property is bounded to the northwest by East Carmel Street and the Highway 78 right-of-way beyond; to the northeast by light industrial properties; to the southeast by Enterprise Street and Trade Street and light industrial properties beyond; and to the southwest by a vacant land parcel and the North County Transit District Sprinter rail-line beyond. A visual reconnaissance survey of adjacent and nearby properties revealed no evidence of surface hazardous substances contamination threatening the subject property or other RECs.

5.0 HISTORICAL USE

Standard historical sources were reviewed with the objective of identifying uses of the subject property since its first developed use or back to 1940, whichever is earlier, in accordance with ASTM Standard Practice E1527-21. Historical use of the subject property was evaluated based on recorded title information, information provided by a representative of the current property owner, and a review of historical aerial photographs, local street directories, topographic maps, and fire insurance maps. Data failure was not encountered.

The subject property was apparently used for limited agricultural purposes such as dry farming and/or livestock grazing during and prior to the 1950s. It appeared unlikely that there were any significant adverse impacts to the site in PIC's judgment based on experience with comparable properties in the site vicinity. There was no apparent historical development of the subject property for significant residential or commercial uses with the exception of the former residential structure in the south-central portion of the site. There were no RECs identified for the subject property based on historical information reviewed for this ESA. Specific findings of the historical site use research are presented below.

5.1 Property Representative Interview

Mr. Gary Levitt, property owner representative, completed the attached User Questionnaire in which he indicated that he is not aware of any environmental cleanup liens that are filed or recorded against the property or of any AULs that are in place at the property. No evidence of RECs was encountered in association with information provided on the attached User Questionnaire (Appendix A).

5.2 Historical Aerial Photographs

Environmental Data Resources, LLC (EDR) provided aerial photographs ranging in age from 1939 to 2016 (Appendix C). Findings of the aerial photograph review are summarized as follows:

Year	Findings for Subject Property and Adjoining Properties
2016	Land use on the subject property and in the site vicinity was similar to present.
2012	Land use at the subject property and in the immediate site vicinity was generally similar to the 2016 photograph.
2009	Land use at the subject property and in the immediate site vicinity was generally similar to the 2012 photograph.

Year	Findings for Subject Property and Adjoining Properties
2005	Land use on the adjacent property to the west was apparently sparsely developed light industrial. (The sprinter rail line was not yet developed.) Otherwise, land use at the subject property and in the immediate site vicinity was generally similar to the 2009 photograph.
1994	Land use at the subject property and in the immediate site vicinity was generally similar to the 2005 photograph. The property to the west of 315 East Carmel Street was less sparsely developed with light industrial improvements.
1990	Land use at the subject property and in the immediate site vicinity was generally similar to the 1994 photograph.
1989	Land use at the subject property and in the immediate site vicinity was similar to the 1990 photograph.
1985	Land use at the subject property and in the immediate site vicinity was generally similar to the 1989 photograph. Properties to the south and southeast were largely undeveloped.
1979	Land use at the subject property and in the immediate site vicinity was similar to the 1985 photograph.
1970	The adjacent property to the west and south was largely undeveloped. Land use to the east appeared to be residential. Land use in the site vicinity was a mix of mostly agriculture and residential.
1967	Land use at the subject property and in the immediate site vicinity was similar to the 1970 photograph.
1964	Land use at the subject property and in the immediate site vicinity was similar to the 1967 photograph.
1953	Land use on the subject property appeared to be agricultural/dry crop cultivation. Highway 78 to the north was not developed. Land use in the site vicinity was largely agricultural and rural residential.
1946	Land use at the subject property and in the immediate site vicinity was similar to the 1953 photograph.
1939	Land use at the subject property and in the immediate site vicinity was similar to the 1946 photograph.

There were no RECs associated with the historical aerial photographs.

5.3 Historical City Directories

A City Directory Report summarizing historical city directories from 1971 to 2020 was provided by EDR (Appendix D). Findings of the City Directory Report review for the subject property and adjoining properties are summarized as follows:

Year	City Directory Report for Occupant/Listing(s) for Subject Property: 337 E Carmel Street
2020	NO LISTING
2017	NO LISTING
2014	OCCUPANT UNKNOWN
2010	OCCUPANT UNKNOWN
2005	OCCUPANT UNKNOWN

There were no RECs associated with the historical city directories.

5.4 Historical Fire Insurance Maps

A Certified Sanborn® Map Report was provided by EDR. According to EDR, there was no fire insurance maps for the subject property and immediate site vicinity (Appendix E).

5.5 Historical Topographic Maps

EDR provided topographic maps for the site and vicinity ranging in age from 1893 to 2012 (Appendix F). There were no features depicted within the subject property or vicinity indicative of RECs on the historical topographic maps.

6.0 REGULATORY AGENCY RECORDS REVIEW

6.1 Subject Property

A search of current Federal, State, and Local regulatory agency databases was conducted by Environmental Data Resources, Inc. (EDR). The EDR FirstSearch Report is provided in Appendix G. The subject property was listed in several database listings, which are summarized as follows:

- US EPA, Facility Index System/Facility Registry System (FINDS)
- US EPA, RCRA Non-Generator/No Longer Regulated (RCRA NonGen/NLR)
- State of California, Hazardous Waste Tracking System (HWTS)
- State of California, Integrated Water Quality System (CIWQS)

The FINDS, RCRA NonGen/NLR, and HWTS listings are references for disposal of regulated wastes, including hazardous wastes. The entity referenced under these listings was Carmel Enterprise, LLC. The wastes were reportedly exported from the subject property for off-site disposal in 2021. There were no RECs reflected in these waste disposal-oriented listings in PIC's judgment.

The CIQWS listing is a reference to a permit that was held by Campus Pointe Medical Centre for construction of storm water containment and/or transmission structures on the subject property that spanned 2007 to 2015. There were no apparent RECs reflected in this storm water management-oriented listing.

6.2 Adjoining Properties

A search of current Federal, State, and Local regulatory agency databases was conducted by EDR for properties adjoining the subject property. The regulatory agency database listings on adjacent properties are summarized as follows:

KRC Rock 315 E Carmel Street San Marcos, CA 92078	San Diego Co. HMMD	Permit records for management of regulated hazardous waste. No RECs.
A and G Industries Inc. 341 Enterprise Street San Marcos, CA 92078	RCRA NonGen/NLR, HAZNET, CERS HAZ WASTE	Disposal records for regulated and/or hazardous wastes. No RECs.

Hubbard Enterprises Teltech Plus Corp 393 Enterprise Street San Marcos, CA 92078	RCRA-LQG, HAZNET, CPS-SLIC, San Diego Co. SAM	Disposal records for regulated and/or hazardous wastes; and assessment/mitigation of copper- and cyanide-impacted soil from a former plating operation (Hubbard Enterprises). No RECs with respect to the subject property.
Creative Electron, Inc. Escon Tool & Manufacturing Co 201 Trade Street San Marcos, CA 92078	RCRA NonGen/NLR, RCRA-SQG, HAZNET	Disposal records for regulated and/or hazardous wastes. No RECs.

There were no RECs with respect to the subject property reflected by these permit and/or disposal records for adjacent properties. The EDR FirstSearch Report is provided in Appendix G.

6.3 Properties in the Site Vicinity

A search of current Federal, State, and Local regulatory agency databases was conducted by EDR for nearby properties in accordance with the approximate minimum search distances specified in ASTM Standard Practice E1527-21 guidelines. According to the EDR FirstSearch Report, there were 154 off-site listings for properties located within the search area (not including businesses that operated within the building at 4401 Manchester Avenue). These included 27 listings for sites with documented releases from Leaky Underground Storage Tanks (LUST) or other Spills, Leaks, Investigation and Cleanup (SLIC) sites. However, there were no LUST/SLIC listings for sites located within ⅛-mile of the subject property. There were no listings in the attached EDR FirstSearch Report that indicated there was any potential adverse impact to the subject property with respect to regulated or hazardous substances.

These included listings for the following three (3) LUST/SLIC sites located within ⅛-mile of the subject property:

Sam Coutts Plastering Inc. 201 La Moree Road San Marcos, CA 92078	0.07 Mile WNW	This is a closed-case LUST site where diesel and gasoline USTs were removed and contaminated soil was excavated. There were no apparent impacts to the subject property.
City of San Marcos 417 Enterprise Street San Marcos, CA 92069	0.07 Mile East	This is a closed LUSTsite as of 1999 located hydrologically cross-gradient where there were no apparent impacts to the subject property.
Howell Construction Inc. 444 Barham Drive San Marcos, CA 92069	0.12 Mile SE	This is a closed-case SLIC site as of 2012 where oily surficial soil and partially filled drums of oil were removed prior to re-development. There were no apparent impacts to the subject property.

Based on public records for the above-referenced sites, as well as all LUST and/or SLIC sites located within ¼ mile of the subject property that are posted on the State of California GeoTracker and/or EnviroStor websites, it appeared unlikely that the subject property has been adversely impacted by releases of regulated or hazardous substances at any of these sites. In PIC's judgement, none of the off-site listings in the EDR FirstSearch Report represent a recognized environmental condition in connection with the subject property, based on the nature of the listings and the locations of the listed properties (Appendix G).

Based on our review of the above-referenced database records, we have concluded that it is unlikely that the subsurface soil, groundwater, or soil vapor beneath the subject property have been adversely impacted in association with any of the sites listed in the attached EDR FirstSearch Report. In PIC's judgement, none of these sites represent a recognized environmental condition in connection with the subject property, based on the nature of the listings and the locations of the listed properties (Appendix G).

7.0 PREVIOUS REPORT

The subject property was previously assessed by way of Phase I ESA report on behalf of Sea Breeze Properties, LLC (PIC, September 9, 2020). The results and conclusions of this previous ESA report, attached in Appendix H, are summarized as follows:

- PIC concluded that there were no RECs associated with land use history on, or near, the subject property. Historical agricultural and automotive uses locally of the site were viewed as minor environmental concerns (*de minimis* conditions), and that there was a low of risk of some impact to surficial soil. The site has since been rough graded, and there are currently no apparent impacts to surficial soil by agricultural or automotive substances.

- No evidence was observed that the subject property has been adversely impacted by contamination on adjacent or nearby properties.

- It was unlikely that the subject property was adversely affected by releases of hazardous or regulated substances on the subject property, or at any sites in the vicinity, based on information presented in the Environmental FirstSearch Report provided by EDR.

- PIC recommended No Further Action at this time regarding environmental site assessment and/or mitigation.

8.0 FINDINGS AND OPINIONS

8.1 Recognized Environmental Conditions

Recognized environmental conditions (RECs) are defined as "(1) the presence of any hazardous substances or petroleum products in, on, or at the subject property; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on , or at the subject property under conditions that pose a material threat of a future release to the environment."

This assessment has revealed no evidence of known or suspect RECs.

8.2 Controlled Recognized Environmental Conditions

Controlled recognized environmental conditions (CRECs) are defined as "a recognized environmental condition (REC) affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, activity and use limitations or other property use limitations)."

This assessment has revealed no evidence of known or suspect CRECs.

8.3 Historical Recognized Environmental Conditions

Historical recognized environmental conditions (HRECs) are defined as "a previous release of any hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example activity and use limitations or other property use limitations)."

This assessment has revealed no evidence of known or suspect HRECs.

8.4 De Minimis Conditions

De minimis conditions are conditions that generally do not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This assessment has revealed no evidence of de minimus conditions.

9.0 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E 1527-21 of 337 East Carmel Street, San Marcos, CA 92078, the property. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed no evidence of recognized environmental conditions (including controlled recognized environmental conditions) in connection with the property. PIC recommends No Further Action at this time regarding environmental site assessment and/or mitigation.

10.0 LIMITATIONS

This report is proprietary and confidential, to be delivered to, and intended for the exclusive use of, the above-referenced parties only. PIC Environmental Services assumes no responsibility nor liability for the reliance herein or use hereof by anyone other than the above-named parties. Furthermore, the results of the government database review was prepared and provided by Environmental Data Resources, Inc. (EDR), which is responsible for the accuracy and completeness of the information provided.

We declare that to the best of our knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property (Appendix I). We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Should you have any questions or comments regarding the contents of this report, please do not hesitate to contact Danny Oliver at (858) 259-3140.

Respectfully submitted,
PIC ENVIRONMENTAL SERVICES

Daniel C. Oliver

APPENDIX A

User Questionnaire

USER QUESTIONNAIRE

Property Address: 337 E Carmel Street
San Marcos, CA 92078

Please respond to all of the following questions to the best of your knowledge. The purpose of this questionnaire is to comply with the requirements of ASTM Standard Practice E1527-21. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Attach additional pages if necessary.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
   ☐ Yes ☒ No If yes, please describe:

2. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
   ☐ Yes ☒ No If yes, please describe:

3. Do you have specialized knowledge or experience related to the property or nearby properties? For example, are you in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   ☒ Yes ☐ No If yes, please describe: Same owner since the Sept 2019 Phase 1 report. No chemicals or environmental issues are/have been present at the property.

4. Is the purchase price being paid for the property or the property valuation lower than the fair market value of the property because contamination is known or believed to be present at the property?
   ☐ Yes ☒ No If yes, please describe:

5. Are you aware of any commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, do you know the past uses of the property, do you know specific chemicals that are present or were once present at the property, do you know of any spills or chemical releases at the property, or do you know of any environmental cleanups that have taken place at the property?
   ☒ Yes ☐ No If yes, please describe: Same owner since the Sept 2019 Phase 1 report. No chemicals or environmental issues are/have been present at the property.

6. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
   ☐ Yes ☒ No If yes, please describe:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Certified Sanborn® Map Report

01/18/24

Site Name:

Carmel Enterprise
337 East Carmel Street
San Marcos, CA 92078
EDR Inquiry # 7544144.3

Client Name:

PIC Environmental Services
PO Box 805
Solana Beach, CA 92075-0000
Contact: Danny Oliver

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by PIC Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # E801-47B1-B7CB

PO # NA

Project ES9731

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: E801-47B1-B7CB

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

PIC Environmental Services (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by PIC Environmental Services were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

stating they removed soil and collected soil samples. The samples were analyzed for TRPH. The samples from the bottom of the excavations had a maximum of 17.5 mg/kg and the stockpile samples were composited and had a maximum of 31.7 mg/kg. The property has since been redeveloped into a commercial building which does not appear to have any permits attached to the APN. The concentrations of TRPH do not warrant keeping the case open. There does not appear to have been a significant release. We are administratively closing this case for soils only. The groundwater was not investigated and we cannot render an opinion on potential groundwater impacts.

on the site. In December 2003, SECOR advanced seven exploratory soil borings at the site as part of a site assessment. Six borings (BA2, BA3, BA4, BA5, BA7, and BA8) were advanced in the vicinity of the gasoline underground storage tanks (USTs) and one boring (BA 1) was advanced near the waste oil UST. Groundwater was encountered in each boring at depths ranging from 25 to 28 feet below ground surface (bgs). In addition to soil samples, groundwater samples were obtained from each boring. The total petroleum hydrocarbon as gasoline (TPHg) concentrations in the soil samples ranged from <0.10 milligrams per kilogram (mg/kg) to 0.65 mg/kg. Methyl tert-butyl ether (MTBE) was detected in five of six soil samples to a maximum concentration of 0.66 mg/kg. MTBE was reported in groundwater at concentrations up to 12,000 ug/l in the groundwater samples collected from the borings advanced near the gasoline USTs and fuel dispensers. TPHg was reported at concentrations up to 12,000 ug/l in groundwater. Case H22756-001 was opened based on this analytical data. In total, nine groundwater monitoring wells were installed for this case. Groundwater in the Richland Hydrologic Subarea of the San Marcos Hydrologic Area of the Carlsbad Hydrologic Unit has been identified as having beneficial uses for municipal, agricultural, and industrial service purposes. According to information in SECOR's 2007 Sensitive Receptor Survey, no water supply wells were identified within a one-mile radius of the site. URS contacted the California Department of Water Resources (DWR) and requested completion reports for wells located within one mile of the subject property. DWR provided completion reports for wells in the area. Most of the records were for groundwater monitoring wells related to fuel releases from gasoline stations in the area. Ten domestic supply or irrigation wells were identified that appeared to be located within one mile of the site. Of the ten, eight were at least 1,000 feet from the site; two wells might be as close as 500 to 700 feet from the site. During an area reconnaissance conducted on May 10, 2010 from public rights-of-way, URS personnel did not observe obvious indications of water supply wells within a one-quarter mile radius of the site. Trend analysis of the groundwater indicates the dissolved-phase MTBE will attenuate to the maximum contaminant level by 2017, and the dissolved-phase tert butyl alcohol (TBA) levels will attenuate to the maximum contaminant level by 2012. The environmental consultant concludes in a Corrective Action Plan that no significant risk to human health or the environment exists from the release and that natural attenuation will remediate the release. DEH concurs with that conclusion.

Database Descriptions

NPL: NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

NPL Delisted: Delisted NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Delisted NPL - National Priority List Deletions

CERCLIS: SEMS SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. SEMS - Superfund Enterprise Management System

NFRAP: SEMS-ARCHIVE SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site. SEMS-ARCHIVE - Superfund Enterprise Management System Archive

RCRA COR ACT: CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

RCRA TSD: RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

RCRA GEN: RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-VSQG - RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators).

Federal IC / EC: US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List US INST CONTROLS - Institutional Controls Sites List.

Database Descriptions

ERNS: ERNS Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances. ERNS - Emergency Response Notification System

State/Tribal NPL: RESPONSE Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. RESPONSE - State Response Sites

State/Tribal CERCLIS: ENVIROSTOR The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. ENVIROSTOR - EnviroStor Database

State/Tribal SWL: SWF/LF (SWIS) Active, Closed and Inactive Landfills. SWF/LF records typically contain an inve ntory of solid waste disposal facilities or landfills. These may be active or i nactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites. SWF/LF (SWIS) - Solid Waste Information System

State/Tribal LTANKS: LUST SANTA CLARA LUST REG 9 - Leaking Underground Storage Tank Report. LUST REG 8 - Leaking Underground Storage Tanks. LUST REG 7 - Leaking Underground Storage Tank Case Listing. Local Land Records: DEED Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners. DEED - Deed Restriction Listing

1.0 EXECUTIVE SUMMARY

This report summarizes the findings of PIC Environmental Services (PIC) Phase I Environmental Site Assessment (ESA) for the property referenced as Campus Pointe, 337 East Carmel Street, San Marcos, California (Figures 1-3). This report has been prepared in accordance with ASTM Standard Practice E1527-13.

The subject property is located on the southeast side of East Carmel Street, between Industrial Street and Venture Street, in the University District of San Marcos, San Diego County, California. It consists of two (2) adjoining parcels that total approximately 6.24 acres (APNs 220-201-01 and 02). It is largely vacant and unused with the exception of a residential structure in the south-central portion of the site and a barn structure in the southeastern portion of the site. These are leased by Mr. Ed Whitney who resides in the house and stores weed abatement equipment in the barn and another out building. The eastern half of the site is bisected by an unlined northwest-flowing drainage channel. The undeveloped portions of the site are largely vacant with the exception of shipping containers and miscellaneous building materials in the western third of the site. The ESA results are summarized as follows:

- The subject property was reportedly used for limited agricultural purposes such as dry farming and/or livestock grazing until at least the 1950s. With the exception of the existing residential structure in the south-central portion of the site, there was no apparent historical development of the subject property for residential or commercial uses.

- PIC concluded that there were no RECs associated with land use history on, or near, the subject property. It's unlikely that the site was significantly impacted by chemicals of concern used for agricultural purposes, such as pesticides or herbicides, in PIC's judgment.

- The interior space of the barn structure in the east-central portion of the site contained remnants of former automotive transmission maintenance work. There was no evidence of significant adverse impacts to the site; however, there may be some remnant surficial oily soil beneath the barn structure. PIC views this matter as a minor (de minimis) condition that can, if warranted, be managed during pre-development grading operations.
- No evidence of the current storage or use of hazardous materials or regulated substances was observed at the subject property.

- No evidence was observed that the subject property has been adversely impacted by contamination on adjacent or nearby properties.

- It is unlikely that the subject property has been adversely affected by releases of hazardous or regulated substances at any sites in the vicinity based on information presented in the attached Environmental FirstSearch Report provided by Environmental

Data Resources, Inc. (EDR).

- This assessment has revealed no evidence of recognized environmental conditions in connection with the property, and PIC recommends No Further Action at this time regarding environmental site assessment and/or mitigation.

2.0 INTRODUCTION

2.1 Purpose of Investigation

PIC Environmental Services (PIC) was contracted by Sea Breeze Properties, LLC, a prospective buyer, to perform a Phase I Environmental Site Assessment (ESA) for the property referenced as Campus Pointe, San Diego County APNs 220-201-01 and 02, University District of San Marcos, California. This ESA was conducted in order to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (landowner liability protections): that is, the practice that constitutes "All Appropriate Inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C §9601(35)(B).

The objective of this investigation was to identify the presence of any recognized environmental conditions (RECs), including controlled recognized environmental conditions (CRECs) and historical recognized environmental conditions (HRECs), in connection with the subject property. RECs are defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release.

CRECs are defined as a recognized environmental condition (REC) resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous materials or petroleum products allowed to remain in place subject to the implementation of required controls such as property use restrictions, activity and land use limitations (AULs), institutional controls, or engineering controls. HRECs are defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

The term REC is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Involved Parties

This ESA was authorized by and/or prepared on behalf of Sea Breeze Properties, LLC.

2.3 Scope of Work/Limitations

This Phase I Environmental Site Assessment was performed in conformance with the scope and limitations of ASTM Standard Practice E1527-13. The scope of this investigation included:

- Site reconnaissance and appropriate interviews;
- Reconnaissance inspection of adjacent and nearby properties;
- Review of federal, state, and local regulatory agency records;
- Review of standard historical site use information sources; and
- Review of physical setting sources including topographic, geologic, and hydrologic information.

No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. The performance of the environmental site assessment described in this report was conducted to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the subject property within reasonable limits of time and cost.

The scope of this investigation did not include considerations that are considered beyond the scope of ASTM Standard Practice E1527-13 such as inspections for asbestos containing materials (ACMs), mold, lead-based paint, lead in drinking water, regulatory compliance, or other non-scope considerations.

2.4 User Provided Information

PIC was not provided with any information regarding the results of research into environmental liens or AULs in connection with the subject property. ASTM Standard Practice E1527-13 does not impose on the environmental professional the responsibility to undertake a review of recorded land title records for environmental liens or activity and use limitations; however, in order to satisfy the standards and practices for All Appropriate Inquiries (AAI), the user may wish to engage a title company or title professional to undertake such a review.

A User Questionnaire was completed by the current property owner's representative, and they indicated that they are not aware of any environmental liens or AULs in connection with the subject property (Appendix A).

2.5 Data Gaps

No significant data gaps and/or data failure that would affect PIC's ability to identify RECs in connection with the subject property were encountered in the course of this ESA.

PIC was not furnished with any information regarding a review of recorded land title records for environmental liens or AULs; however, the current property owner or their representative indicated on the attached User Questionnaire that they were unaware of any environmental liens or AULs in connection with the subject property. In PIC's judgement, this data gap does not affect our ability to identify RECs in connection with the subject property.

3.0 PROPERTY CHARACTERISTICS & PHYSICAL SETTING

3.1 Location

The subject property is located on the southeast side of East Carmel Street, between Industrial Street and Venture Street, in the University District of San Marcos, San Diego County, California (Figures 1-3).

3.2 Subject Property Description

The subject property consists of two (2) adjoining parcels that total approximately 6.24 acres (APNs 220-201-01 and 02). It is largely vacant and unused with the exception of a residential structure in the south-central portion of the site and a barn structure in the southeastern portion of the site. These are leased by Mr. Ed Whitney who resides in the house and stores weed abatement equipment in the barn and another out building. The eastern half of the site is bisected by an unlined northwest-flowing drainage channel. The undeveloped portions of the site are largely vacant with the exception of shipping containers and miscellaneous building materials in the western third of the site. General site features are depicted on Figure 3 and site photographs are provided in Appendix B.

3.3 Adjoining Properties

The major land use feature in the site vicinity is California State University San Marcos (CSUSM). The site vicinity is improved mostly with light industrial properties; however, the area is undergoing rapid re-development.

The subject property is bounded to the northwest by East Carmel Street and the Highway 78 right-of-way beyond; to the northeast by light industrial properties; to the southeast by Enterprise Street and Trade Street and light industrial properties beyond; and to the southwest by the North County Transit District Sprinter rail-line and light industrial/retail properties beyond. Land use on adjacent properties and within the immediate site vicinity is illustrated on Figure 3.

3.4 Topography

The elevation at the subject property is approximately 590 to 620 feet above mean sea level. The land surface grade in the site vicinity slopes gently to the northwest, toward San Marcos Creek (Figure 2).

3.5 Soils/Geology

Surface soils on the subject property include Placentia sandy loam (PeC) and Visalia sandy loam (VaB) according to the on-line USDA soil survey map. These soil types commonly occur on slopes ranging between 2% and 9%. The parent material consists of alluvium derived from granite.

The surface geology at the subject property and vicinity is depicted on published geologic maps as mid-Cretaceous-aged Green Valley Tonalite (CDMG, 1996).

3.6 Surface Water Hydrology

Surface water runoff apparently flows northwesterly within an on-site unlined drainage channel to San Marcos Creek, which flows southwesterly to Lake San Marcos. The outlet of Lake San Marcos flows southwesterly to Bataquitos Lagoon, which empties into the Pacific Ocean approximately 11 miles southwest of the subject property.

3.7 Hydrogeology

The subject site lies in the Richland Hydrologic Subarea of the San Marcos Hydrologic Area within the Carlsbad Hydrologic Unit, part of the San Diego Region (*Water Quality Control Plan for the San Diego Basin (9)*, California Regional Water Quality Control Board, On-Line). Potential and existing beneficial use designations of groundwater in the Richland Hydrologic Subarea include municipal and domestic supply, agricultural supply, and industrial service supply.

Site specific information regarding the depth to groundwater and groundwater gradient direction beneath the subject property was not readily available. The depth to groundwater has been encountered at a nearby site at depths ranging from approximately 10 to 15 feet below ground surface (bgs) and flows generally to the north or northwest.

No municipal groundwater production wells were depicted within ½-mile of the subject property on the USGS topographic quadrangle.

4.0 SITE RECONNAISSANCE

A site reconnaissance was conducted by a representative of PIC on August 24, 2020 in general accordance with the scope and limitations specified in ASTM Practice E1527-13. The objective of the site reconnaissance was to identify potential RECs in connection with the subject property. Findings of the site reconnaissance are summarized as follows.

4.1 Hazardous Materials/Regulated Substances

No evidence of the current storage or use of significant quantities of hazardous materials or regulated substances was observed at the subject property.

No strong, pungent, or noxious odors were encountered, and no evidence of pools or sumps containing liquids likely to be hazardous materials or regulated substances was observed at the subject property.

4.2 Above Ground Tanks and Drums

There was a propane tank observed near the residential structure in the south-central portion of the site. In addition, there were several empty drums, 5-gallon buckets, and small propane tanks observed in the barn structure and an out building near the residential structure. Otherwise, no evidence of existing above ground storage tanks (ASTs), drums, or other containers of hazardous materials or petroleum products was observed at the subject property.

4.3 Underground Storage Tanks & Containment Structures

No evidence of former or existing underground storage tanks (USTs), sumps, ponds, or other subsurface structures used to contain hazardous or regulated substances was observed at the subject property.

4.4 Polychlorinated Biphenyl Containing Equipment

No evidence of leakage and/or spillage from equipment possibly containing polychlorinated biphenyls (PCBs) was observed at the site.

4.5 Interior Observations

The interior space of the barn structure in the east-central portion of the site contained remnants of former automotive transmission maintenance work. There was no evidence of significant adverse impacts to the site; however, there may be some remnant surficial oily soil beneath the barn structure. PIC views this matter as a minor (de minimis) condition that can, if warranted, be managed during pre-development grading operations.

4.6 Exterior Observations

No evidence of pits, ponds, or lagoons was observed at the subject property. No evidence of significant surficial staining, stressed vegetation, groundwater production wells, injection wells, or groundwater monitoring wells was observed at the subject property.

According to the tenant, Mr. Ed Whitney, the residence is serviced by a septic tank and, possibly, leach field on the northern side of the structure. This feature is not viewed as a REC in light of the site's historical agricultural/residential use (Section 5).

No evidence was observed of solid waste disposal such as stockpiles or areas that are apparently filled or graded by non-natural causes (or filled by soil of unknown origin) suggesting trash, construction debris, demolition debris, or other solid waste disposal.

4.7 Area Reconnaissance

The major land use feature in the site vicinity is California State University San Marcos (CSUSM). The site vicinity is improved mostly with light industrial properties; however, the area is undergoing rapid re-development.

The subject property is bounded to the northwest by East Carmel Street and the Highway 78 right-of-way beyond; to the northeast by light industrial properties; to the southeast by Enterprise Street and Trade Street and light industrial properties beyond; and to the southwest by the North County Transit District Sprinter rail-line and light industrial/retail properties beyond. A visual reconnaissance survey of adjacent and nearby properties revealed no evidence of surface hazardous substances contamination threatening the subject property or other RECs.

5.0 HISTORICAL USE

Standard historical sources were reviewed with the objective of identifying uses of the subject property since its first developed use or back to 1940, whichever is earlier, in accordance with ASTM Standard Practice E1527-13. Historical use of the subject property was evaluated based on recorded title information, information provided by representatives of the current property owner, and a review of historical aerial photographs, local street directories, and fire insurance maps. Data failure was not encountered.

The subject property was apparently used for limited agricultural purposes such as dry farming and/or livestock grazing during and prior to the 1950s. Although there may be some residual remnants of agricultural substances, such as pesticides and herbicides, in near-surficial soils on the site, it appeared unlikely that there were any significant adverse impacts to the site in PIC's judgment based on experience with comparable properties in the site vicinity. This historical agricultural use is viewed as a de minimis condition in PIC's judgment.

There was no apparent historical development of the subject property for residential or commercial uses with the exception of the existing residential structure in the south-central portion of the site.

There was evidence observed of some historical limited automotive work performed within the barn structure in the eastern portion of the site. Although there may be some residual surficial oily soil within the barn structure, the potential impact appeared minor. This apparent short-term automotive use is viewed as a de minimis condition in PIC's judgment.

Specific findings of the historical site use research are presented below.

5.1 Property Representative Interviews

Mr. Alexander Zirpolo (property owner representative) completed the attached User Questionnaire on which he indicated that he was not aware of any obvious indicators that point to the presence or likely presence of contamination at the property. He was not aware of any environmental cleanup liens that are filed or recorded against the property or of any AULs that are in place at the property. No evidence of RECs was encountered in association with the information provided on the attached User Questionnaire (Appendix A).

PIC interviewed Mr. Matt Weaver of Lee & Associates (property owner representative) on August 24, 2020. Mr. Weaver was unaware of any releases of hazardous materials or regulated substances to the subject property.

5.2 Historical Aerial Photographs

Environmental Data Resources, Inc. (EDR) provided aerial photographs ranging in age from 1939 to 2016 (Appendix C). Findings of the aerial photograph review are summarized as follows:

Year	Findings
2016	Land use on the subject property and in the site vicinity was similar to present.
2012	Land use at the subject property and in the immediate site vicinity was generally similar to the 2016 photograph.
2009	Land use at the subject property and in the immediate site vicinity was generally similar to the 2012 photograph.
2005	Land use on the adjacent property to the west was apparently sparsely developed light industrial. (The sprinter rail line was not yet developed.) Otherwise, land use at the subject property and in the immediate site vicinity was generally similar to the 2009 photograph.
1994	Land use at the subject property and in the immediate site vicinity was generally similar to the 2005 photograph. The property to the west of 315 East Carmel Street was less sparsely developed with light industrial improvements.
1990	Land use at the subject property and in the immediate site vicinity was generally similar to the 1994 photograph.
1989	Land use at the subject property and in the immediate site vicinity was similar to the 1990 photograph.
1985	Land use at the subject property and in the immediate site vicinity was generally similar to the 1989 photograph. Properties to the south and southeast were largely undeveloped.
1979	Land use at the subject property and in the immediate site vicinity was similar to the 1985 photograph.
1970	The adjacent property to the west and south was largely undeveloped. Land use to the east appeared to be residential. Land use in the site vicinity was a mix of mostly agriculture and residential.
1967	Land use at the subject property and in the immediate site vicinity was similar to the 1970 photograph.
1964	Land use at the subject property and in the immediate site vicinity was similar to the 1967 photograph.

Year	Findings
1953	Land use on the subject property appeared to be agricultural/dry crop cultivation. Highway 78 to the north was not developed. Land use in the site vicinity was largely agricultural and rural residential.
1946	Land use at the subject property and in the immediate site vicinity was similar to the 1953 photograph.
1939	Land use at the subject property and in the immediate site vicinity was similar to the 1946 photograph.

5.3 Historical City Directories

A City Directory Report summarizing listings in historical city directories from 1975 to 2017 for the site vicinity was provided by EDR (Appendix D). These listings are summarized as follows:

Year	Occupants of 315-337 East Carmel Street, San Marcos, CA
2017	NO LISTINGS
2014	337: OCCUPANT UNKNOWN
2010	337: OCCUPANT UNKNOWN
2005	337: OCCUPANT UNKNOWN
2000	315: KRC ROCK 337: ANYTHING GOES
1995	315: KRC ROCK
1992	315: KRC ROCK
1986	315: KRAFT STEVE CONSTR MERLI CNCRTE PUMPNG PALOMAR HLB MBL HM R K O EQUIPMENT CO
1982	315: R K O EQUIPMENT CO 333: XXXX 337: XXXX

Year	Occupants of 315-337 East Carmel Street, San Marcos, CA
1979	315: FREEWAY BORING MILLER EQUIPMENT R K O EQUIPMENT CO 333: XXXX 337: XXXX
1975	315: FREEMAN&SON EQPMNT FREEWAY BORING CO 333: XXXX 337: XXXX

5.4 Historical Fire Insurance Maps

A Certified Sanborn® Map Report was provided by EDR. According to EDR, no fire insurance map coverage was available in the complete holdings of the Sanborn® Library, LLC for the subject property or immediate site vicinity (Appendix E).

5.5 Historical Topographic Maps

EDR provided topographic maps for the site and vicinity ranging in age from 1893 to 2012 (Appendix F). There were no features depicted within the subject property or vicinity indicative of RECs on the historical topographic maps.

6.0 REGULATORY AGENCY RECORDS REVIEW

6.1 Subject Property

A search of current Federal, State, and Local regulatory agency databases was conducted by Environmental Data Resources, Inc. (EDR). The EDR FirstSearch Report is provided in Appendix G. The subject property was listed in the following databases:

- California Integrated Water Quality System Project (CIWQS)
- State of California, Hazardous Waste Facility and Manifest Data (HAZNET)
- Federal EPA RCRA Non Generator/Small Quantity Generator (RCRA SQG)
- San Diego County Hazardous Materials Management Division Permit (HMMD)

The CIWQS listing is a reference to a State and/or San Diego Regional Water Quality Control Board database record for a site of environmental interest. In this case, the site is referenced as 337 East Carmel Street and the matter of interest was construction of stormwater management/mitigation measures that were apparently proposed in conjunction with a previous development plan for the site that was never implemented. The development was referenced as Twin Oaks Corporate Center and Campus Pointe Medical Center. The development never occurred and the plan for the construction of stormwater management structures was terminated in 2015.

The HAZNET and RCRA SQG listings are references largely to registration of former and current occupants on the California Environmental Reporting System (CERS) and/or disposal records for wastes, including hazardous wastes, generated by various historical and current occupants at the property formerly referenced as 315 East Carmel Street. The occupants referenced in these listings included the following:

- Custom Welding and Fabrication
- North County Transit District

The HAZNET listing for North County Transit District indicated that the following wastes were transported off-site for appropriate disposal in 2002:

CA Waste Code 331: Off-specification organics
CA Waste Code 221: Waste oil and mixed oil

These wastes were transported off-site for disposal, and there were no apparent RECs reflected in these waste management and disposal records.

The San Diego County HMMD listing is a reference to a permit issued by the San Diego County Department of Environmental Health, Hazardous Materials Management Division (HMMD) to

K.R.C. Rock, a business that previously operated at 315 East Carmel Street. PIC obtained and reviewed the attached HMMD records for the subject property that spanned 1996 to 2002 (Appendix H). The HMMD records reflected the storage of regulated substances and the generation and temporary storage of regulated wastes. These records consisted of annual inspection reports and indicated that there were several administrative violations. However, there were no major violations indicative of significant adverse impacts to the subject property by spills, leaks, or other releases reflected in the attached governmental agency records for the subject property (Appendices G and H).

In PIC's judgment, there were no RECs reflected in the attached governmental agency records for the subject property (Appendices G and H).

6.2 Properties in the Site Vicinity

A search of current Federal, State, and Local regulatory agency databases was conducted by EDR for nearby properties in accordance with the approximate minimum search distances specified in ASTM Standard Practice E1527-13 guidelines. According to the EDR FirstSearch Report, there are 160 off-site listings for properties located within the search area, and 15 of these listings are for sites with documented releases from Leaky Underground Storage Tanks (LUST) or other Spills, Leaks, Investigation and Cleanup (SLIC) sites. These included six (6) listings for the following six (6) LUST/SLIC sites located within ⅛-mile of the subject property. Information regarding these LUST/SLIC sites are briefly summarized as follows:

Hubbard Enterprises, 393 Enterprise Street, San Marcos, California
This site is located east-southeast of the subject property. The SLIC site case file was closed in 2007 after the site was assessed and mitigated and it was determined that there were negligible volumes of residual copper- and cyanide-contaminated soil with no consequential adverse impacts to groundwater quality or public health. There were no apparent adverse impacts to the subject property.

North County Health Services, 350-358 Rancheros Drive, San Marcos, California
This site is located north-northeast of the subject property. According to the EDR FirstSearch listing, no action was required. There were no records posted on the State EnviroStor and GeoTracker database sites.

Sam Coutts Plastering Inc., 201 La Moree Road, San Marcos, California
This LUST site is located approximately 0.05 mile east-southeast of the subject property. Following the removal of gasoline, diesel, and waste oil USTs, 75 cubic yards of contaminated soil was excavated and disposed off-site. The case was closed in 1999 after several years of monitoring. It appeared unlikely that the subject property was adversely impacted by this LUST site.

North County Health Services, 100 Valpreda Road, San Marcos, California
This SLIC site is located north-northeast of the subject property. It was investigated by the State of California, Department of Toxic Substances Control and found to be free of any contamination. DTSC concluded that no action was needed for development of the property.

City of San Marcos, 417 Enterprise Street, San Marcos, California
This LUST site is located east of the subject property. A release of gasoline was discovered in 1993. On-line information regarding this case was scant; however, it appeared that the case was closed in 1999 following assessment and mitigation operations. It's unlikely that the subject property was adversely impacted by this LUST site.

Consolidated Freightways, 444 Barham Drive, San Marcos, California
This site is located southeast of the subject property. The SLIC site case file was closed in 2012 after oil-impacted surficial soil was mitigated. The site was subsequently re-developed. There were no apparent adverse impacts to the subject property.

According to public records regarding all LUST and/or SLIC sites located within ¼ mile of the subject property that are posted on the State of California GeoTracker and/or EnviroStor websites, it appeared unlikely that the subject property has been significantly impacted by releases of hazardous substances at any of these sites. Based on information provided in the above-referenced public records, there was no evidence that contaminated soil or groundwater at the listed LUST and/or SLIC sites has adversely impacted public health or water resources at the subject property.

In PIC's judgement, none of the sites listed in the EDR FirstSearch Report represent a recognized environmental condition in connection with the subject property, based on the nature of the listings and the locations of the listed properties (Appendix G).

The nearest LUST site to the subject property is listed at Unocal Service Station, 102 E Carmel Street, San Marcos, California. This site is located between ⅛-mile and ¼-mile northwest, hydrogeologically down-gradient, of the subject property. PIC reviewed public records related to this release on the State Water Resources Control Board's GeoTracker database. The unauthorized release case at this site was closed with no further action required by the local regulatory agency in 2011, and site assessment results indicated that it was unlikely that the subsurface soil, groundwater, or soil vapor beneath the subject property have been adversely impacted in association with this release. There were no other EDR FirstSearch Report listings that warranted further evaluation in PIC's judgment.

Based on our review of the above-referenced database records, we have concluded that it is unlikely that the subsurface soil, groundwater, or soil vapor beneath the subject property have been adversely impacted in association with any of the sites listed in the attached EDR FirstSearch Report. In PIC's judgement, none of these sites represent an REC in connection with the subject property, based on the nature of the listings and the locations of the listed properties (Appendix G).

7.0 FINDINGS AND OPINIONS

7.1 Recognized Environmental Conditions

Recognized environmental conditions (RECs) are defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release.

This assessment has revealed no evidence of known or suspect RECs.

7.2 Controlled Recognized Environmental Conditions

Controlled recognized environmental conditions (CRECs) are defined as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous materials or petroleum products allowed to remain in place subject to the implementation of required controls such as property use restrictions, activity and land use limitations, institutional controls, or engineering controls.

This assessment has revealed no evidence of known or suspect CRECs.

7.3 Historical Recognized Environmental Conditions

Historical recognized environmental conditions (HRECs) are defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

This assessment has revealed no evidence of known or suspect HRECs.

7.4 De Minimis Conditions

De minimis conditions are conditions that generally do not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This assessment has revealed no evidence of de minimus conditions, with the exception of the following:

- *The subject property was apparently used for limited agricultural purposes such as dry farming and/or livestock grazing during and prior to the 1950s. Although there may be some residual remnants of agricultural substances, such as pesticides and herbicides, in near-surficial soils on the site, it appeared unlikely that there were any significant adverse impacts to the site in PIC's judgment based on experience with comparable properties in the site vicinity.*

- *There was evidence observed of some historical limited automotive work performed within the barn structure in the eastern portion of the site. Although there may be some residual surficial oily soil within the barn structure, the potential impact appeared minor.*

8.0 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E 1527-13 of the property referenced as Campus Pointe, 337 East Carmel Street, San Marcos, California, the property. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report. This assessment has revealed no evidence of recognized environmental conditions (including controlled recognized environmental conditions) in connection with the property. PIC recommends No Further Action at this time regarding environmental site assessment and/or mitigation.

9.0 LIMITATIONS

This report is proprietary and confidential, to be delivered to, and intended for the exclusive use of, the above-referenced parties only. PIC Environmental Services assumes no responsibility nor liability for the reliance herein or use hereof by anyone other than the above-named parties. Furthermore, the results of the government database review was prepared and provided by Environmental Data Resources, Inc. (EDR), which is responsible for the accuracy and completeness of the information provided.

We declare that to the best of our knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property (Appendix I). We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Should you have any questions or comments regarding the contents of this report, please do not hesitate to contact Danny Oliver at (858) 259-3140.

Respectfully submitted,
PIC ENVIRONMENTAL SERVICES

APPENDIX A

User Questionnaire

USER QUESTIONNAIRE

Property Address: 337 EAST CARMEL STREET
SAN MARCOS, CA

Please respond to all of the following questions to the best of your knowledge. The purpose of this questionnaire is to comply with the requirements of ASTM Standard Practice E1527-13. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Attach additional pages if necessary.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
   ☐ Yes ☒ No If yes, please describe:

2. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
   ☐ Yes ☒ No If yes, please describe:

3. Do you have specialized knowledge or experience related to the property or nearby properties? For example, are you in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   ☐ Yes ☒ No If yes, please describe:

4. Is the purchase price being paid for the property or the property valuation lower than the fair market value of the property because contamination is known or believed to be present at the property?
   ☐ Yes ☒ No If yes, please describe:

5. Are you aware of any commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, do you know the past uses of the property, do you know specific chemicals that are present or were once present at the property, do you know of any spills or chemical releases at the property, or do you know of any environmental cleanups that have taken place at the property?
   ☐ Yes ☒ No If yes, please describe:

6. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
   ☐ Yes ☒ No If yes, please describe:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

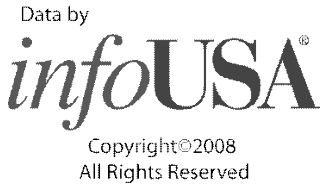

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Certified Sanborn® Map Report

08/11/20

Site Name:

Campus Pointe
337 East Carmel Street
San Marcos, CA 92078
EDR Inquiry # 6151534.3

Client Name:

PIC Environmental Services
PO Box 805
Solana Beach, CA 92075-0000
Contact: Danny Oliver

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by PIC Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # F558-4F46-91A3

PO # NA

Project ES9731

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: F558-4F46-91A3

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

PIC Environmental Services (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. Comments: Pursuant to the MOU, DTSC has reviewed an Environmental Impact Report prepared for the San Marcos Town Centre. North County Health Services is proposing to lease property within the Town Centre development on which to construct a new community health clinic facility to replace its existing San Marcos clinic. The subject property is currently

Region: STATE
Facility Status: Completed - Case Closed
Status Date: 01/26/2012
Global Id: T0608142212
Lead Agency: SAN DIEGO COUNTY LOP
Lead Agency Case Number: H29653-001
Latitude: 33.1357543929784
Longitude: -117.153568267822
Case Type: Cleanup Program Site
Case Worker: SW
Local Agency: SAN DIEGO COUNTY LOP
RB Case Number: Not reported
File Location: Local Agency
Potential Media Affected: Not reported
Potential Contaminants of Concern: Not reported
Site History: This case was referred from Hazmat on 9/26/1989 for obvious surface soil contamination with discoloration and strong odors. The site was a vacant lot where not quite empty drums of motor oil, bonding agent and water seal leaked. California Geophysical submitted a report stating they removed soil and collected soil samples. The samples were analyzed for TRPH. The samples from the bottom of the excavations had a maximum of 17.5 mg/kg and the stockpile samples were composited and had a maximum of 31.7 mg/kg. The property has since been redeveloped into a commercial building which does not appear to have any permits attached to the APN. The concentrations of TRPH do not warrant keeping the case open. There does not appear to have been a significant release. We are administratively closing this case for soils only. The groundwater was not investigated and we cannot render an opinion on potential groundwater impacts.

Local Agency: SAN DIEGO COUNTY LOP
File Location: Local Agency
Local Case Number: H22756-001
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: The site is an active 76 gasoline station. Aboveground structures existing on site include a single-story automotive repair building, cashier's office, and six product dispensers. There are two 12,000-gallon unleaded gasoline USTs and one 500-gallon waste oil UST on the site. In December 2003, SECOR advanced seven exploratory soil borings at the site as part of a site assessment. Six borings (BA2, BA3, BA4, BA5, BA7, and BA8) were advanced in the vicinity of the gasoline underground storage tanks (USTs) and one boring (BA 1) was advanced near the waste oil UST. Groundwater was encountered in each boring at depths ranging from 25 to 28 feet below ground surface (bgs). In addition to soil samples, groundwater samples were obtained from each boring. The total petroleum hydrocarbon as gasoline (TPHg) concentrations in the soil samples ranged from <0.10 milligrams per kilogram (mg/kg) to 0.65 mg/kg. Methyl tert-butyl ether (MTBE) was detected in five of six soil samples to a maximum concentration of 0.66 mg/kg. MTBE was reported in groundwater at concentrations up to 12,000 ug/l in the groundwater samples collected from the borings advanced near the gasoline USTs and fuel dispensers. TPHg was reported at concentrations up to 12,000 ug/l in groundwater. Case H22756-001 was opened based on this analytical data. In total, nine groundwater monitoring wells were installed for this case.
Groundwater in the Richland Hydrologic Subarea of the San Marcos Hydrologic Area of the Carlsbad Hydrologic Unit has been identified as having beneficial uses for municipal, agricultural, and industrial service purposes. According to information in SECOR's 2007 Sensitive

Receptor Survey, no water supply wells were identified within a one-mile radius of the site. URS contacted the California Department of Water Resources (DWR) and requested completion reports for wells located within one mile of the subject property. DWR provided completion reports for wells in the area. Most of the records were for groundwater monitoring wells related to fuel releases from gasoline stations in the area. Ten domestic supply or irrigation wells were identified that appeared to be located within one mile of the site. Of the ten, eight were at least 1,000 feet from the site; two wells might be as close as 500 to 700 feet from the site. During an area reconnaissance conducted on May 10, 2010 from public rights-of-way, URS personnel did not observe obvious indications of water supply wells within a one-quarter mile radius of the site. Trend analysis of the groundwater indicates the dissolved-phase MTBE will attenuate to the maximum contaminant level by 2017, and the dissolved-phase tert butyl alcohol (TBA) levels will attenuate to the maximum contaminant level by 2012. The environmental consultant concludes in a Corrective Action Plan that no significant risk to human health or the environment exists from the release and that natural attenuation will remediate the release. DEH concurs with that conclusion.

Database Descriptions

NPL: NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

NPL Delisted: Delisted NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Delisted NPL - National Priority List Deletions

CERCLIS: SEMS SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. SEMS - Superfund Enterprise Management System

NFRAP: SEMS-ARCHIVE SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site. SEMS-ARCHIVE - Superfund Enterprise Management System Archive

RCRA COR ACT: CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

RCRA TSD: RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

RCRA GEN: RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-VSQG - RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators).

Federal IC / EC: US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List US INST CONTROLS - Institutional Controls Sites List.

Database Descriptions

ERNS: ERNS Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances. ERNS - Emergency Response Notification System

State/Tribal NPL: RESPONSE Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. RESPONSE - State Response Sites

State/Tribal CERCLIS: ENVIROSTOR The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. ENVIROSTOR - EnviroStor Database

State/Tribal SWL: SWF/LF (SWIS) Active, Closed and Inactive Landfills. SWF/LF records typically contain an inve ntory of solid waste disposal facilities or landfills. These may be active or i nactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites. SWF/LF (SWIS) - Solid Waste Information System

State/Tribal LTANKS: NAPA CO. LUST SAN DIEGO CO. SAM - Environmental Case Listing. SOLANO CO. LUST - Leaking Underground Storage Tanks. SAN MATEO CO. LUST - Fuel Leak List. ORANGE CO. SLIC REG 8 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. SLIC REG 9 - Spills, Leaks, Investigation & Cleanup Cost Recovery Listing. Sacramento Co. CS - Toxic Site Clean-Up List.

State/Tribal Tanks: MILITARY UST SITES UST - Active UST Facilities. UST CLOSURE - Proposed Closure of Underground Storage Tank (UST) Cases. Military ust sites UST CLOSURE - Military UST Sites (GEOTRACKER) AST - Aboveground Petroleum Storage Tank Facilities. INDIAN UST R6 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land. INDIAN UST R8 - Underground Storage Tanks on Indian Land. INDIAN UST R1 - Underground Storage Tanks on Indian Land. INDIAN UST R10 - Underground Storage Tanks on Indian Land. INDIAN UST R4 - Underground Storage Tanks on Indian Land. INDIAN UST R5 - Underground Storage Tanks on Indian Land. INDIAN UST R9 - Underground Storage Tanks on Indian Land.

Database Descriptions

State/Tribal VCP: VCP Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. VCP - Voluntary Cleanup Program Properties

US Brownfields: US BROWNFIELDS Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. US BROWNFIELDS - A Listing of Brownfields Sites

Other SWF: WMUDS/SWAT SAN DIEGO CO. LF - Solid Waste Facilities. CA LA LF - City of Los Angeles Landfills. LOS ANGELES CO. LF - List of Solid Waste Facilities. VENTURA CO. LF - Inventory of Illegal Abandoned and Inactive Sites. Ventura County Inventory of Closed, Illegal Abandoned, and Inactive Sites. VENTURA CO. LF - Inventory of Illegal Abandoned and Inactive Sites IHS OPEN DUMPS - Open Dumps on Indian Land.

Other Haz Sites: SCH This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose. SCH - School Property Evaluation Program SAN DIEGO CO. HMMD - Hazardous Materials Management Division Database. CERS HAZ WASTE - CERS HAZ WASTE. US CDL - Clandestine Drug Labs. PFAS - PFAS Contamination Site Location Listing.

Other Tanks: SWEEPS UST Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list. SWEEPS UST - SWEEPS UST Listing ALAMEDA CO. UST - Underground Tanks. KERN CO. UST - Underground Storage Tank Sites & Tank Listing. MARIN CO. UST - Underground Storage Tank Sites. NAPA CO. UST - Closed and Operating Underground Storage Tank Sites. ORANGE CO. UST - List of Underground Storage Tank Facilities. RIVERSIDE CO. UST - Underground Storage Tank Tank List. SAN FRANCISCO CO. UST - Underground Storage Tank Information. SOLANO CO. UST - Underground Storage Tanks. SUTTER CO. UST - Underground Storage Tanks. VENTURA CO. UST - Underground Tank Closed Sites List. LOS ANGELES UST - Active & Inactive UST Inventory. YOLO CO. UST - Underground Storage Tank Comprehensive Facility Report. EL SEGUNDO UST - City of El Segundo Underground Storage Tank. LONG BEACH UST - City of Long Beach Underground Storage Tank. UST SAN JOAQUIN - San Joaquin Co. UST. UST MENDOCINO - Mendocino County UST Database. TORRANCE UST - City of Torrance Underground Storage Tank. LOS ANGELES AST - Active & Inactive AST Inventory. SAN FRANCISCO AST - Aboveground Storage Tank Site Listing. CERS TANKS - California Environmental Reporting System (CERS) Tanks. CA FID UST - Facility Inventory Database.

Local Land Records: DEED Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners. DEED - Deed Restriction Listing

Database Descriptions

Spills: HMIRS Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT. HMIRS - Hazardous Materials Information Reporting System CHMIRS - California Hazardous Material Incident Report System. Orange Co. Industrial Site - List of Industrial Site Cleanups. SPILLS 90 - SPILLS90 data from FirstSearch.

Other: RCRA NonGen / NLR RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste. RCRA NonGen / NLR - RCRA - Non Generators / No Longer Regulated FEDLAND - Federal and Indian Lands. TSCA - Toxic Substances Control Act. COMPLIANCE INSPECTION REPORT

BUSINESS NAME KRC Rock
ADDRESS 315 E. Carmel St
CITY/ZIP San Marcos 92069
CONTACT Jerry Sebby
TITLE President
PHONE 744-1036

On the above date an inspection of your business/facility was conducted in order to determine compliance with the California Health and Safety Code (H&S) Chapters 6.5, 6.7, 6.95; Titles 19, 22 and 23 of the California Code of Regulations (CCR); and the San Diego County Code (SDCC). The following remarks are intended to provide guidance to correct the violations noted on the attached violation report.

JUN 28 1996

Processed 7/18/96 MC

Office Use Only

An inspection of this business was made to determine if hazardous materials/waste are stored or generated on site. The inspection concluded that waste oil, oil filters, parts washer, diesel fuel & used oil are on site that requires a Health permit. A permit application was obtained at the inspection.

1) Observed waste oil stored on site in excess of allowable time period. Corrective action, dispose of waste oil within 90 days after 27 gallons is collected.

2) Observed 10 waste oil drums without labels. Corrective action, immediately label all waste oil drums. Labels are to describe the physical state, composition, hazardous properties, generator information, & accumulation start date when oil was first put inside the drum.

3) Observed drained used oil filters labels on the drums but NO accumulation date was on the labels. No bill of lading was available for review. Corrective action. Corrective action, show the date on the drum when filters are first put inside the drums. Keep copies of receipts.

COMPLIANCE INSPECTION REPORT

BUSINESS ADDRESS: 315 E. Carmel St.

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

I HAZARDOUS WASTE REQUIREMENTS:

RECORD KEEPING

1 [X] Health Permit not obtained SDCC 68.905 V0108 W
[ ] No EPA Identification Number 66262.12 V0105 W
[ ] Waste Manifests/Receipts not on-site for 3 years 66262.40 V0118 W
[ ] Manifest not properly completed 66262.23 V0120 W
[ ] Manifest copy not sent to CAL-EPA 66262.23 V0115 W
[ ] TSDF signed-manifest not on-site 66262.40 V0121 W
[ ] Biennial report not sent to CAL-EPA 66262.41 V0122 W
[ ] LDR Documentation not available 66268.7 V0123 W
[ ] Exception Rpt. not filed with CAL-EPA 66262.42 V0116 W
[ ] Operating TSDF without authorization 25201 V0124 W

STORAGE AND HANDLING

2 [X] Waste stored longer than 90 days 66262.34 V0221 W
3 [X] Waste container missing/improperly labeled 66262.34 V0222 W
[ ] Haz Materials not properly labeled 25124 V0223 W
[ ] Waste container not kept closed 66265.173 V0202 W
[ ] Waste container in poor condition 66265.171 V0205 W
[ ] Waste container(s) not properly managed 66265.173 V0210 W
[ ] Damaged container not repackaged 66265.171 V0226 W
[ ] Container incompatible with waste 66265.172 V0207 W
[ ] Incompatibles in the same container 66265.177 V0224 W
[ ] Incompatibles not stored separately 66265.177 V0213 W
[ ] Ignitible Wastes less than 50 feet 66265.176 V0214 W
[ ] Ignitible Wastes not grounded 66265.31 V0215 W
[ ] Storage area not inspected weekly 66265.174 V0216 W

DISPOSAL AND TRANSPORTATION

[ ] Unauth. disposal of waste to _____ 25189.5 V0313 W
[ ] Waste determination not made 66262.11 V0319 W
[ ] Unlawful transport of haz. waste 25163 V0315 W
[ ] Waste transported without manifest 66262.20 V0316 W
[ ] No Extremely Haz. Waste Permit 67430.1 V0317 W

TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

[ ] Training records unavailable 66265.16 V0405 W
4 [X] Training program not adequate 66265.16 V0406 W
[ ] Facility not designed to minimize release 66265.31 V0501 W
[ ] Spill control equip not available 66265.32 V0508 W
[ ] Aisle space is obstructed 66265.35 V0509 W
[ ] Contingency plan not prepared and/or on file 66265.51, 66265.53 V0609 W

MISCELLANEOUS

[ ] Waste oil contaminated 25250.7 V0225 W
5 [X] Used oil filters improperly managed 66266.130 V0701 W
[ ] Damaged batteries improperly managed 66266.81 V0702 W

II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

GENERAL UST REQUIREMENTS

[ ] Health Permit not obtained 68.1005, 25284 V3002 T
[ ] Repair/modify/close permit not obtained 68.1005 V3007 T
[ ] UST Permit Application not submitted 25286(a) V3010 T
[ ] Operating permit conditions violated 2712 V3011 T
[ ] Failed to notify HMMD of changes 25284 V3012 T
[ ] No owner/operator agreement 25293 V3005 T
[ ] No records of financial coverage 25292.2 V3013 T
[ ] No maint/monit/calib records available 2712(b), 2641i V3001 T

MONITORING REQUIREMENTS (SINGLE WALL)

[ ] Leak Detection Method does not meet performance standards 2643 V3014 T
[ ] Annual Integrity test not conducted 25292 V3015 T
[ ] Copy of tank test not submitted to HMMD within 30 days 2643 V3016 T
[ ] Manual tank gauging (<2000 gal) 2645 not done properly V3017 T
[ ] Reconciliation not done properly 2646 V3018 T
[ ] Reconciliation not approved for facility 2646 V3019 T
[ ] Dispenser meter(s) not calib annually 2646 V3020 T
[ ] Improper liquid measurements 2646 V3021 T
[ ] Stick in poor condition 2646 V3022 T
[ ] Improper monthly reconciliation 2646 V3023 T
[ ] Failed to report excessive variation 2646 V3024 T
[ ] Pressurized Product Piping Leak Device not tested annually 25292 V3025 T

MONITORING REQUIREMENTS (DOUBLE WALL)

[ ] Monitoring system not functional 2632 V3026 T
[ ] No written monitoring procedure 2632 V3027 T
[ ] Written response plan not available 2632 V3028 T
[ ] Spill/Overfill equip. not maintained or installed 2635 V3029 T

RELEASE REPORTING

[ ] Failure to report an unauthorized release 25295 V3009 T
[ ] Release record log not available 2651, 2650 V3030 T
[ ] No leak report/investigation/action 2652 V3031 T

CLOSURE

[ ] Temporary closure req. not completed 2671 V3006 T
[ ] Abandoned tank not properly closed 25298 V3032 T
[ ] Permanent closure req. not completed 2672 V3033 T

III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

RECORD KEEPING

[ ] Health Permit not obtained SDCC 68.1105 V2001 W
6 [X] Business Plan not established/implemented 25503.5 V2002 W
[ ] Business Plan not submitted to HMMD 25505 V2007 W
[ ] Business Plan not amended 25505 V2003 W
7 [X] Personnel Training Records not available 2732 V2302 W

RELEASE REPORTING

[ ] Failure to report a release/threatened release 25507 V2008 W

BUSINESS PLAN ELEMENTS

[ ] Emergency Response Plan inadequate 25504 V2201 W
[ ] Emergency Contacts not provided/current 25509 V2203 W
[ ] Personnel Training Program inadequate 25504 V2301 W
[ ] Inventory is incomplete 25504 V2005 W
[ ] Site Map is not sufficient 25509 V2202 W
[ ] Acutely Haz. Mat. not registered 25533 V2009 W

An inspection summary report will be mailed shortly. All violations must be corrected. Please call (619) 338-2222 if you have any questions.

COMPLIANCE INSPECTION REPORT

BUSINESS NAME KRC Rock
ADDRESS 315 B CARMEL ST
CITY/ZIP San Marcos 92069

On the above date an inspection of your business/facility was conducted in order to determine compliance with the California Health and Safety Code (H&S) Chapters 6.5, 6.7, 6.95; Titles 19, 22 and 23 of the California Code of Regulations (CCR); and the San Diego County Code (SDCC). The following remarks are intended to provide guidance to correct the violations noted on the attached violation report.

Office Use Only

SEP 15 1998

Processed 10-22-98 ZJ

Routine Inspection
Observation - violation
① One black 500 gallon used oil tank had an unreadable label on it Corrective Action. See General Hazardous Waste Requirements handout for proper hazardous waste labeling information.
② Training records not available for inspection. Corrective Action. Keep documentation of employee Training on hazardous wastes/materials handling emergency procedures - includes employee's signature.
③ Used oil filters improperly managed Corrective Action: Used oil filters must be stored and transported in a closed rainproof container that is capable of containing oil that leaks out.

BUSINESS ADDRESS: 375 Carmel St SM

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

I HAZARDOUS WASTE REQUIREMENTS:

RECORD KEEPING

- [ ] Health Permit not obtained SDCC 68.905 — V0108 W
- [ ] No EPA Identification Number 66262.12 — V0105 W
- [ ] Waste Manifests/Receipts not on-site for 3 years 66262.40 — V0118 W
- [ ] Manifest not properly completed 66262.23 — V0120 W
- [ ] Manifest copy not sent to DTSC 66262.23 — V0115 W
- [ ] TSDF signed-manifest not on-site 66262.40 — V0121 W
- [ ] Biennial report not sent to DTSC 66262.41 — V0122 W
- [ ] LDR Documentation not available 66268.7 — V0123 W
- [ ] Exception Rpt. not filed with DTSC 66262.42 — V0116 W
- [ ] Operating TSDF without authorization 25201 — V0124 W

STORAGE AND HANDLING

- [ ] Waste stored longer than 90, 180, or 270 days 66262.34 — V0221 W
- [ ] Failure to clean up hazwaste off of floor surface 66262.10b — V0313 W
- [ ] Waste container missing/improperly labeled 66262.34 — V0222 W
- [X] Haz Materials not properly labeled 25124 — V0223 W
- [ ] Waste container not kept closed 66265.173 — V0202 W
- [ ] Waste container in poor condition 66265.171 — V0205 W
- [ ] Waste container(s) not properly managed 66265.173 — V0210 W
- [ ] Damaged container not repackaged 66265.171 — V0226 W
- [ ] Container incompatible with waste 66265.172 — V0207 W
- [ ] Incompatibles in the same container 66265.177 — V0224 W
- [ ] Incompatibles not stored separately 66265.177 — V0213 W
- [ ] Ignitible Waste less than 50 feet 66265.176 — V0214 W
- [ ] Ignitible Waste not grounded 66265.31 — V0215 W
- [ ] Storage area not inspected weekly 66265.174 — V0216 W

DISPOSAL AND TRANSPORTATION

- [ ] Unauth. disposal of waste to _____ 25189.5 — V0313 W
- [ ] Waste determination not made 66262.11 — V0319 W
- [ ] Unlawful transport of haz. waste 25163 — V0315 W
- [ ] Waste transported without manifest 66262.20 — V0316 W
- [ ] Extremely Haz Waste Permit not obtained 25205.7 — V0317 W

TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- [X] Training records unavailable 66265.16 — V0405 W
- [ ] Training program not adequate 66265.16 — V0406 W
- [ ] Facility not designed to minimize release 66265.31 — V0501 W
- [ ] Spill control equip not available 66265.32 — V0508 W
- [ ] Aisle space is obstructed 66265.35 — V0509 W
- [ ] Contingency plan not prepared and/or on file 66265.51, 66265.53 — V0609 W

MISCELLANEOUS

- [ ] Waste oil contaminated 25250.7 — V0225 W
- [X] Used oil filters improperly managed 66266.130 — V0701 W
- [ ] Damaged batteries improperly managed 66266.81 — V0702 W
- [ ] Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered permitting) — V0125 W
- [ ] Onsite treatment of waste without authorization 25201 — V0125 W

II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

GENERAL UST REQUIREMENTS

- [ ] Health Permit not obtained 68.1005, 25284 — V3002 T
- [ ] Repair/modify/close permit not obtained 68.1005 — V3007 T
- [ ] UST Permit Application not submitted 25286(a) — V3010 T
- [ ] Operating permit conditions violated 2712 — V3011 T
- [ ] Failed to notify HMMD of changes 25284 — V3012 T
- [ ] No owner/operator agreement 25284 — V3005 T
- [ ] No records of financial coverage 25292.2 — V3013 T
- [ ] No maint/monit/calib records available 2712(b), 2641(j) — V3001 T
- [ ] Monitoring Equip. not tested annually 2630, 2641 — V3003 T

MONITORING REQUIREMENTS (SINGLE WALL)

- [ ] Leak Detection Method does not meet performance standards 2643 — V3014 T
- [ ] Integrity test not conducted 25292 — V3015 T
- [ ] Copy of tank test not submitted to HMMD within 30 days 2643 — V3016 T
- [ ] Manual tank gauging (<2000 gal) 2645 not done properly — V3017 T
- [ ] Reconciliation not done properly 2646 — V3018 T
- [ ] Reconciliation not approved for facility 2646 — V3019 T
- [ ] Dispenser meter(s) not calib annually 2646 — V3020 T
- [ ] Improper liquid measurements 2646 — V3021 T
- [ ] Stick in poor condition 2646 — V3022 T
- [ ] Improper monthly reconciliation 2646 — V3023 T
- [ ] Failed to report excessive variation 2646 — V3024 T
- [ ] Pressurized Product Piping Leak Device not tested annually 25292 — V3025 T
- [ ] No written monitoring procedure 2641 — V3027 T
- [ ] No written emergency response plan 2641 — V3027 T
- [ ] SIR reporting incorrectly done 2646.1 — V3004 T

MONITORING REQUIREMENTS (DOUBLE WALL)

- [ ] Monitoring system not functional 2632 — V3026 T
- [ ] No written monitoring procedure 2632 — V3027 T
- [ ] Written emergency response plan not available 2632 — V3028 T
- [ ] Spill/Overfill equip. not maintained or installed 2635 — V3029 T

RELEASE REPORTING

- [ ] Failure to report an unauthorized release 25295 — V3009 T
- [ ] Release record log not available 2651, 2650 — V3030 T
- [ ] No leak report/investigation/action 2652 — V3031 T

CLOSURE

- [ ] Temporary closure req. not completed 2671 — V3006 T
- [ ] Unused tank not properly closed 25298 — V3032 T
- [ ] Permanent closure req. not completed 2672 — V3033 T
- [ ] Failed to apply for temporary closure 25298 — V3008 T

III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

RECORD KEEPING

- [ ] Health Permit not obtained SDCC 68.1105 — V2001 W
- [ ] Business Plan not established/implemented 25503.5 — V2002 W
- [ ] Business Plan not submitted to HMMD 25505 — V2007 W
- [ ] Business Plan not amended 25505 — V2003 W
- [X] Personnel Training Records not available 19 CCR 2732 — V2302 W

RELEASE REPORTING

- [ ] Failure to report a release/threatened release 25507 — V2008 W

BUSINESS PLAN ELEMENTS

- [ ] Emergency Response Plan inadequate 25504 — V2201 W
- [ ] Emergency Contacts not provided/current 25509 — V2203 W
- [ ] Personnel Training Program inadequate 25504 — V2301 W
- [ ] Inventory is incomplete 25504 — V2005 W
- [ ] Site Map is not sufficient 25509 — V2202 W
- [ ] Acutely Haz. Mat. not registered 25533 — V2009 W

ALL VIOLATIONS MUST BE CORRECTED. PLEASE CALL (619) 338-2222 OR YOUR INSPECTOR IF YOU HAVE ANY QUESTIONS.

SUPPLEMENTAL INSPECTION REPORT

Office Use Only

BUSINESS ADDRESS: 315 E. Carmel St ZIP CODE: 92069

Remarks - continued -

- this facility currently use a 500 gallon above ground single wall steel tank for used oil. Be advised that regulations in effect Jan 24, 1998 require all hazardous waste storage tanks to have engineered + certified 100% secondary containment. EXISTING secondary containment - (cinder block wall is broken in several areas and does not meet the above standard.

to Comply - install engineer certified secondary containment (100%), with written fire Marshall approval and required permits within 60 days or use 55 gallon drums - which are currently exempt from the above regulations.

Owner states that he is NOW using a mobil repair service that will carry waste oil away. (contract on site) - and that any other waste/used oil will be stored in labelled, secure, 55 gallon drums.

Questions - Peter Monnich 940-2953

[ ] Facility not designed to minimize release 66265.31 V0501 W____
[ ] Spill control equip not available 66265.32 V0508 W____
[ ] Aisle space is obstructed 66265.35 V0509 W____
[ ] Contingency plan not prepared and/or on file 66265.51, 66265.53 V0609 W____

MISCELLANEOUS

[ ] Waste oil contaminated 25250.7 V0225 W____
[ ] Used oil filters improperly managed 66266.130 V0701 W____
[ ] Damaged batteries improperly managed 66266.81 V0702 W____
[ ] Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered permitting) V0125 W____
[ ] Onsite treatment of waste without authorization 25201 V0125 W____

II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

GENERAL UST REQUIREMENTS

[ ] Health Permit not obtained 68.1005, 25284 V3002 T____
[ ] Repair/modify/close permit not obtained 68.1005 V3007 T____
[ ] UST Permit Application not submitted 25286(a) V3010 T____
[ ] Operating permit conditions violated 2712 V3011 T____
[ ] Failed to notify HMMD of changes 25284 V3012 T____
[ ] No owner/operator agreement 25284 V3005 T____
[ ] No records of financial coverage 25292.2 V3013 T____
[ ] No maint/monit/calib records available 2712(b), 2641(j) V3001 T____
[ ] Monitoring Equip. not tested annually 2630, 2641 V3003 T____

MONITORING REQUIREMENTS (SINGLE WALL)

[ ] Leak Detection Method does not meet performance standards 2643 V3014 T____
[ ] Integrity test not conducted 25292 V3015 T____
[ ] Copy of tank test not submitted to HMMD within 30 days 2643 V3016 T____
[ ] Manual tank gauging (<2000 gal) 2645 not done properly V3017 T____
[ ] Reconciliation not done properly 2646 V3018 T____
[ ] Reconciliation not approved for facility 2646 V3019 T____
[ ] Dispenser meter(s) not calib annually 2646 V3020 T____
[ ] Improper liquid measurements 2646 V3021 T____
[ ] Stick in poor condition 2646 V3022 T____
[ ] Improper monthly reconciliation 2646 V3023 T____
[ ] Failed to report excessive variation 2646 V3024 T____
[ ] Pressurized Product Piping Leak Device not tested annually 25292 V3025 T____
[ ] No written monitoring procedure 2641 V3027 T____
[ ] No written emergency response plan 2641 V3027 T____
[ ] SIR reporting incorrectly done 2646.1 V3004 T____

MONITORING REQUIREMENTS (DOUBLE WALL)

[ ] Monitoring system not functional 2632 V3026 T____
[ ] No written monitoring procedure 2632 V3027 T____
[ ] Written emergency response plan not available 2632 V3028 T____
[ ] Spill/Overfill equip. not maintained or installed 2635 V3029 T____

RELEASE REPORTING

[ ] Failure to report an unauthorized release 25295 V3009 T____
[ ] Release record log not available 2651, 2650 V3030 T____
[ ] No leak report/investigation/action 2652 V3031 T____

CLOSURE

[ ] Temporary closure req. not completed 2671 V3006 T____
[ ] Unused tank not properly closed 25298 V3032 T____
[ ] Permanent closure req. not completed 2672 V3033 T____
[ ] Failed to apply for temporary closure 25298 V3008 T____

III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

RECORD KEEPING

[ ] Health Permit not obtained SDCC 68.1105 V2001 W____
[ ] Business Plan not established/implemented 25503.5 V2002 W____
[ ] Business Plan not submitted to HMMD 25505 V2007 W____
[ ] Business Plan not amended 25505 V2003 W____
[ ] Personnel Training Records not available 19 CCR 2732 V2302 W____

RELEASE REPORTING

[ ] Failure to report a release/threatened release 25507 V2008 W____

BUSINESS PLAN ELEMENTS

[ ] Emergency Response Plan inadequate 25504 V2201 W____
[ ] Emergency Contacts not provided/current 25509 V2203 W____
[ ] Personnel Training Program inadequate 25504 V2301 W____
[ ] Inventory is incomplete 25504 V2005 W____
[ ] Site Map is not sufficient 25509 V2202 W____
[ ] Acutely Haz. Mat. not registered 25533 V2009 W____

ALL VIOLATIONS MUST BE CORRECTED. PLEASE CALL (619) 338-2222 OR YOUR INSPECTOR IF YOU HAVE ANY QUESTIONS

TITLE OF BUSINESS REPRESENTATIVE

APPENDIX I

Professional Qualifications

KEY PERSONNEL

Daniel C. Oliver, President and General Manager
California Professional Geologist No. 4781

Mr. Oliver adds 35+ years of environmental geology and consultation experience to PIC, in addition to his Bachelor's and Master's degrees in environmental studies and geology. He has managed assessments at nearly 3,000 sites in the western states region. He has managed numerous contaminated site mitigation projects in southern California, including numerous sites contaminated by leaking underground storage tanks. Prior to joining Team PIC, he worked for various regional and national environmental consulting firms with offices in southern California. He performed environmental investigations and mitigation at petroleum production and refining facilities in Los Angeles and Orange Counties in California. Mr. Oliver performed research and field investigations at waste disposal/landfill sites throughout southern California, and was assistant project manager for the characterization and selection of California's proposed low-level radioactive waste disposal facility. The controversial LLRW development project was later terminated for political reasons.

APPENDIX I

Professional Qualifications

KEY PERSONNEL

Daniel C. Oliver, President and General Manager
California Professional Geologist No. 4781

Mr. Oliver adds over 35 years of environmental geology and consultation experience to PIC, in addition to his Bachelor's and Master's degrees in environmental studies and geology. He has managed assessments at over 2,500 sites in the western states region. He has managed numerous contaminated site mitigation projects in southern California, including numerous sites contaminated by leaking underground storage tanks. Prior to joining Team PIC, he worked for various regional and national environmental consulting firms with offices in southern California. He performed environmental investigations and mitigation at petroleum production and refining facilities in Los Angeles and Orange Counties in California. Mr. Oliver performed research and field investigations at waste disposal/landfill sites throughout southern California, and was assistant project manager for the characterization and selection of California's proposed low-level radioactive waste disposal facility. The controversial LLRW development project was later terminated for political reasons.
